E-Prescribing/Medical History Consent Form

Dr. Melissa C Verde uses an electronic medical records system that allows electronic prescribing of medications. Prescriptions are sent to your pharmacy through a secure connection which improves the accuracy and timely transmission of medications and enhances patient safety.

The Medicare Modernization Act (MMA) 2003 listed standards that must be included in an ePrescribe program.

These include:

- Formulary and benefit transactions--Gives the prescriber information about which drugs are covered by the drug benefit plan.
- Medication history transaction--Provides the physician with information about previous and current medications the patient is taking to minimize the number of adverse drug reactions.
- Fill status notification--Allows the prescriber to receive an electronic notice from the pharmacy stating if the patient's prescriptions has been picked up or partially filled.

My signature certifies that I have read and understood the scope of my consent and that I authorize Dr. Verde to electronically prescribe and to access my medication history.
